Seattle, Washington 98101

Dear Mr. Johnston:

SUBJECT: CRUDE OIL TOPPING UNIT FLARE, KUPARUK OIL
FIELD PSD PERMIT APPLICATION

This is to confirm my telephone conversation of May 21, 1981 with David Tetta. The flare at the Crude Oil Topping Unit (COTU) proposed for the Central Processing Facility will be for emergency flare purposes only. The hydro-carbon vapors that may be produced from processing diesel fuel from crude oil will be recovered instead of being flared as mentioned in our application. Please note this change for the purposes of reviewing our application.

Very truly yours,

G. Scott Ronzio
